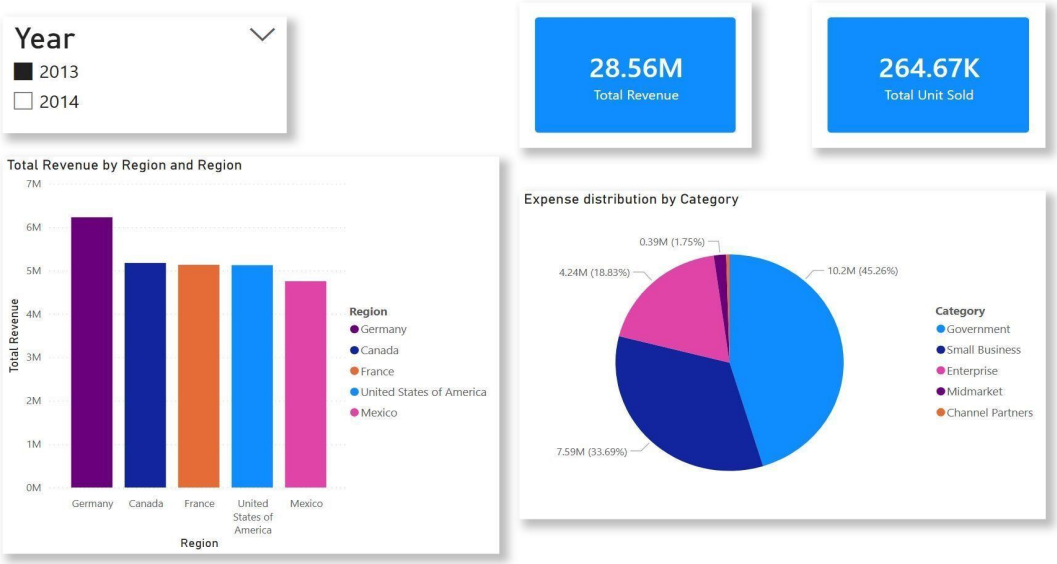
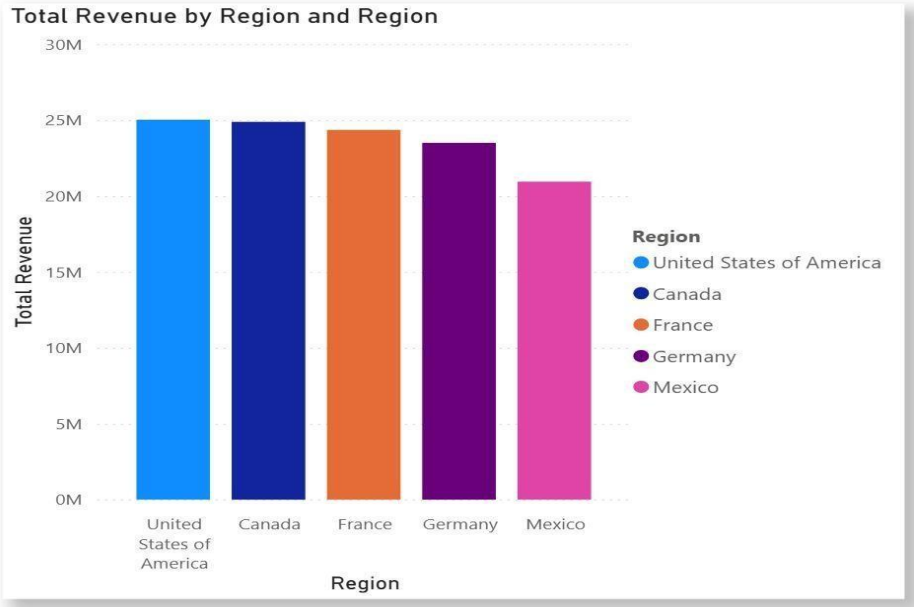
Workshop Week 8

Power BI Basics



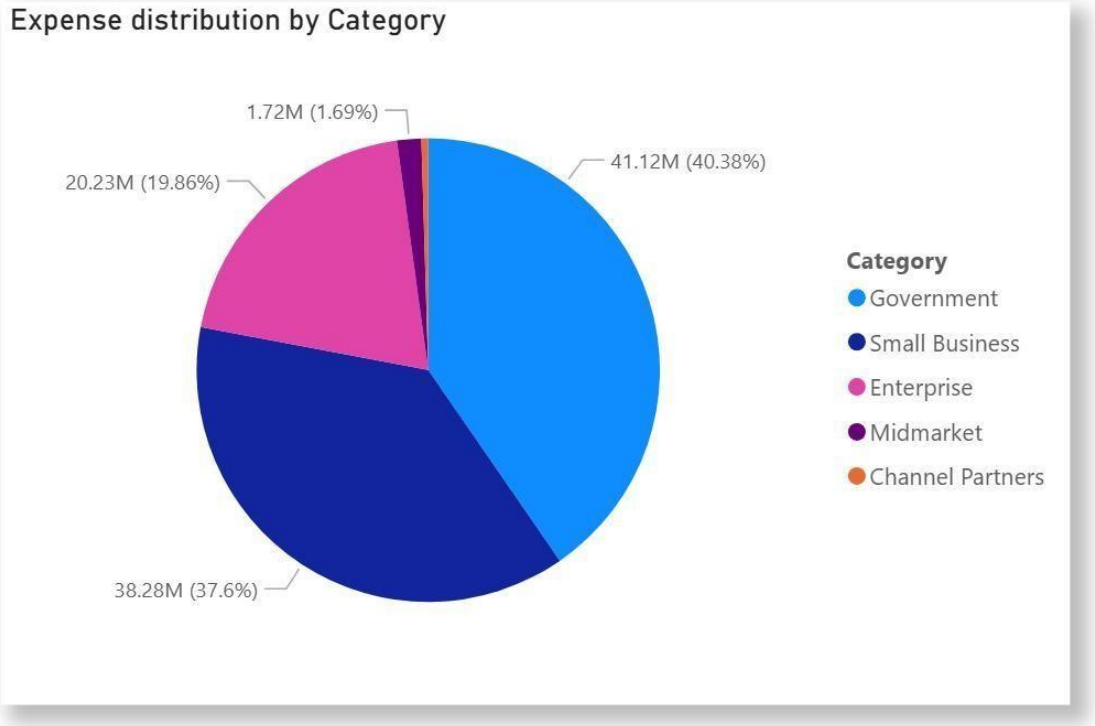
Questions:

1. **Which Region has the highest Revenue?**



From the above bar chart, it is clear that the Region that has the highest Revenue is United States of America with 25M. This means the USA is the biggest market place for the business, selling more than any Region.

2. **How are expenses distributed by Category?**



Above figure is the pie-chart that shows the Expense distribution by Category. From the pie-chart, it is clear that Government takes up the biggest share at 40.38% followed by Small Business at 37.86% and Enterprise at 19.86%. Midmarket and Channel Partners have very small shares.

3. **What is the total number of units sold?**

The total number of Unit sold is 1.13M. This number tells how many products were sold in total across all regions and categories.

4. **How have sales changed over the years?**

In 2013, total sales were 28.56M, which was low, showing the business was still growing at that time.

By 2014, sales jumped to 99.37M, which is a huge increase in just one year.

That kind of jump in just 12 months is very impressive.
